PM400

PM400 Phosphine Fumigation Monitor

Continuously monitor multiple fumigation points using advanced infrared technology and the latest in network communication protocols.

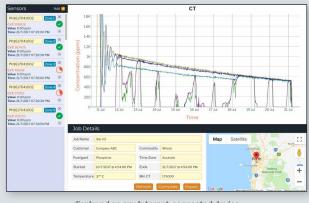

The modular design of the PM400 delivers unmatched phosphine fumigation performance. The user may access multiple sampling points onsite or remotely via a secure encrypted web portal. Phosphine concentration values for each zone are viewed in real-time then automatically archived for later review. This actionable intelligence transforms raw data into informed decision making.
